## Wooden materials

Historically, wood has been the key material of choice for making furniture. This type of furniture is never out of style. Prospects for wooden furniture altered with the industrial revolution.

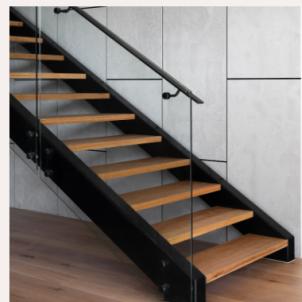

Wooden furniture has increased in popularity over time, despite a fall in output. There is something classic about wooden furniture. Wood is perfect for nearly all styles and color combinations in interior design and has still remained relevant.

### Durability

Wood lasts years with relatively little upkeep

True hardwoods (cherry, white oak, walnut) never lose good quality. Wooden furniture constructed of hardwoods may survive for decades

### Easy to maintain

Cleaning wood only requires routine dusting.

A moist microfiber may be used to wipe up spills and sticky messes. You won't have to be concerned about rust in the future.

### Eco-friendly

Wood is a resource capable of being sustained, unlike plastic.

We can reduce carbon emissions by buying sustainable timber more. It's crucial to purchase wood from sustainable forests.

## Bright colors

One of the most essential and important elements of home design is color. The choice of colors plays a significant role in whether a decorating scheme is successful or unsuccessful.

Combining color with carefully planned furniture and finishes, creating a balanced and appealing design. If in doubt of what to go for a nude or a bright color scheme, here are some tips from Maynooth

#### Making more space

Light and bright walls reflect the maximum amount of light  
Off-white, blue, and greenish tones make a room look bigger  
Dark tones absorb light and make space look cosy and small

#### Accents

It's not always necessary to use accent colors in a tiny space.  
Try placing a bright item on a neutral background  
There is no need to grab attention by different colorful furniture.  
Choose one or two main emphases

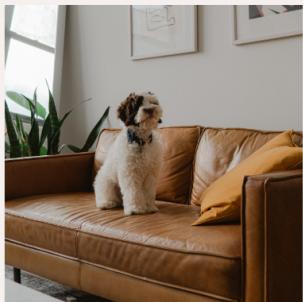

#### On the big scale

Painting a wall or a part of it can help zone out space  
The ideal color distribution for a room is 60% of a dominating color  
30% of a secondary color, and 10% of an accent color.

### Special format

While looking for ideal furniture for your house, you may feel that nothing really suits your ideas or some items have mismatching features that you would gladly change. Choosing to order a specific piece of furniture may seem intimidating or confusing

Maynooth allows you to order a unique item that truly matches your vision. Here are some tips on transforming an image in your head into a real object

#### Unique material

Sometimes the material does not suit you (ex. allergy to wool)  
If you want THAT sofa, but scared your cat or dog would scratch it  
place a request and we'll try to get this sofa with special material

#### Finding your size

If you have a small unused space and nothing seems to fit,  
place a request for an item with note of needed size  
Do not stop yourself from unusual ideas, forms and shapes.

#### Rule breaker

Have you been thinking about a glass bathroom?  
A modern design solution, that might not suit everyone but will spark the imagination of many
